

Registration No.: _____

IMPORTANT NOTE

- 1) This sample paper serves solely as a visual representation of the question paper.
- 2) Each question in the question paper is mapped with corresponding Course Outcome(s) (CO) and Revised Bloom's Taxonomy (RBT) Level. However the question-wise CO-RBT mapping given below is indicative only and will vary in the final question paper.
- 3) Students should refer to the latest course syllabus and question paper pattern for exam preparation.
- 4) The final version of the End Term Examination question paper may differ in terms of layout, design, and content. This sample paper should be viewed for reference purpose only and not as final/official question paper.

24252CHE58018

Paper Code: A

Course Code:CHE110

Course Title:ENVIRONMENTAL STUDIES

Time Allowed: 03:00hrs.

Max Marks: 60

Read the following instructions carefully before attempting the question paper.

1. Match the Paper Code shaded on the OMR Sheet with the Paper code mentioned on the question paper and ensure that both are the same.
2. This question paper contains 60 questions of 1 mark each. 0.25 marks will be deducted for each wrong answer.
3. Attempt all the questions in serial order.
4. Do not write or mark anything on the question paper and/or on rough sheet(s) which could be helpful to any student in copying, except your registration number on the designated space.
5. Submit the question paper and the rough sheet(s) along with the OMR sheet to the invigilator before leaving the examination hall.

Q(1) Which of the following water quality parameter indicate presence of biodegradable/organic pollutant in water?

- (a) DOD (b) DO (c) BOD (d) PAN

CO4,L4

Q(2) Why is the food chain important in an ecosystem?

- (a) It increases the population of animals
(b) It helps in storing energy in the environment
(c) It helps plants grow faster
(d) It shows the flow of energy from one organism to another

CO2,L2

Q(3) The ozone layer is present in -

- (a) Mesosphere (b) Thermosphere (c) Stratosphere (d) None of the above

CO1,L4

Q(4) Corbett national park is located at

- (a) Bihar (b) Nepal (c) Uttar Pradesh (d) Uttarakhand

CO1,L2

Q(5) Which of the following food chains accurately depicts the flow of energy in a terrestrial ecosystem?

- (a) Bacteria → Deer → Wolf (b) Fungi → Dead leaves → Earthworms
(c) Algae → Fish → Phytoplankton (d) Grasshopper → Snake → Hawk

CO2,L2

Q(6) The full name of CFC is

- (a) Carbon floated chlorine (b) Chlorine fluoro carbon
(c) Chlorine fine carbon (d) Chlorine floated carbon

CO1,L2

Q(7) If the producers receive 500 Kcal of energy from sun, what is the percentage of energy which will be transferred from primary to secondary consumers?

- (a) 5 Kcal (b) 500 Kcal (c) 56 Kcal (d) 50 Kcal

CO3,L3

Q(8) Protection of environment is made mandatory for government of India by Article of Indian constitution

- (a) 48-A (b) 48-B (c) 51A (d) 51B

CO1,L4

Q(9) Analyze how the Bishnoi community's practices contribute to environmental conservation. Which practice is most impactful?

- (a) Expanding agricultural activities into forested areas
(b) Promoting the use of fossil fuels for energy
(c) Strict protection of wildlife and forests
(d) Encouraging urban development in their regions

CO4,L4

Registration No.: _____

Q(10) Blue baby syndrome is caused by

- (a) nitrite pollution
- (b) sulphate pollution
- (c) chloride pollution
- (d) nitrate pollution

CO4,L2

Q(11) Under the Forest Conservation Act, 1980, which authority is empowered to approve the diversion of forest land for non-forest purposes?

- (a) Central Government
- (b) State Forest Department
- (c) National Green Tribunal
- (d) Ministry of Environment and Forests and Climate Change (State Division)

CO3,L2

Q(12) Areas in the sea where plastic waste collects are known as what?

- (a) Marine mosh pits
- (b) Ocean garbage patches
- (c) Sea trash cans
- (d) Naval dumping grounds

CO3,L4

Q(13) The Odd-Even Rule in Delhi was introduced to control:

- (a) Soil pollution
- (b) Air pollution
- (c) Noise pollution
- (d) Water pollution

CO3,L2

Q(14) Analyze how human population growth contributes to deforestation. Which of the following is the most direct cause?

- (a) Expansion of agricultural land
- (b) Improved healthcare systems
- (c) Increase in urban green spaces
- (d) Conservation efforts in rural areas

CO4,L4

Q(15) Zone of natinaol park in which limited human activities are allowed to carry out

- (a) Transitional zone
- (b) Core zone
- (c) Developmental zone
- (d) Buffer zone

CO2,L2

Q(16) Region supporting large number of species of which most are endemic is termed as

- (a) Biogeographic region
- (b) Hot spot
- (c) Ecotone
- (d) Soft spot

CO2,L2

Q(17) Numbers of biogeographic regions of India are

- (a) 12
- (b) 10
- (c) 14
- (d) 11

CO2,L2

Q(18) In northern hemisphere cyclone rotation is

- (a) Clockwise
- (b) Counter-clockwise
- (c) Vertical
- (d) Static

CO2,L2

Q(19) Which organization is responsible for managing most of India's national parks and wildlife sanctuaries?

- (a) UNESCO
- (b) WWF
- (c) Ministry of Environment, Forest and Climate Change
- (d) Greenpeace India

CO1,L2

Q(20) Which human activity contributes most to surface water pollution?

- (a) Deforestation
- (b) Agricultural runoff
- (c) Noise pollution
- (d) Cloud seeding

CO2,L2

Registration No.: _____

Q(21) Which of the following is a biodegradable pollution?

- (a) Plastic
- (b) Domestic sewage
- (c) Detergent
- (d) all of the above

CO1,L2

Q(22) Which of the following was started in 1973 to save the evergreen tropical forest in the Palakkad district of Kerala, India from being flooded by a hydroelectric project?

- (a) Chipko Movement
- (b) Silent Valley Movement
- (c) Jungle Bachao Andola
- (d) Appiko Movement

CO4,L3

Q(23) Biotic components donot include

- (a) Autotrophs
- (b) Heterotrophs
- (c) Saprotrophs
- (d) Mineral nutrients

CO1,L2

Q(24) Among the given options choose the correct alternative based upon the following Assertion and Reason statements:

Assertion: Multiple factors control the growth of population in an area.

Reason: Only reduction of birth rate can reduce the population in an area.

- (a) Both the Assertion and the Reason are correct and the Reason is the correct explanation of the Assertion.
- (b) Both Assertion and the Reason are correct but the Reason is not the correct explanation of the Assertion.
- (c) Assertion is true but the Reason is false.
- (d) The statement of the Assertion is false but the Reason is true.

CO1,L2

Q(25) Which of the following is not a function of the State Pollution Control Board under the Water Act?

- (a) Planning comprehensive programs for prevention of water pollution
- (b) Advising the state government on pollution issues
- (c) Approving construction of industrial units
- (d) Inspecting sewage or trade effluents and plants

CO3,L2

Q(26) Choose the correct alternative among given options based on Assertion and Reason statements:

Assertion: Silent Valley Movement protected the beautiful evergreen rain forest in Kerala.

Reason: Silent Valley Movement was against construction of railway network.

- (a) Both the Assertion and the Reason are correct and the Reason is the correct explanation of the Assertion.
- (b) The Assertion and the Reason are correct but the Reason is not the correct explanation of the Assertion.
- (c) Assertion is true but the Reason is false.
- (d) The statement of the Assertion is false but the Reason is true.

CO4,L4

Q(27) The process by which element loss 50% of its radioactive potential

- (a) Loss of full activity
- (b) Half-life period
- (c) Time of degradation
- (d) None of the given

CO1,L4

Q(28) What is main objective of Sardar Sarovar Dam?

- (a) To promote tourism in region
- (b) To develop urban center
- (c) To generate hydroelectric power and provide irrigation and drinking water
- (d) To provide flood control in Gujarat

CO4,L2

Q(29) Which of the following statements is true about SMOG?

- (a) SMOG is derived from both fog and smoke
- (b) SMOG is derived from water vapour
- (c) SMOG is derived from the fog
- (d) SMOG is derived from smoke

CO2,L3

Q(30) Which of the following pollutants is classified as a secondary pollutant?

- (a) Carbon monoxide (CO)
- (b) Nitrogen oxides (NO_x)
- (c) Sulfur dioxide (SO₂)
- (d) Ozone (O₃)

CO1,L1

Registration No.: _____

- Q(31) Which of the following is considered a vulnerable species in India?
(a) Bengal Tiger
(b) Sarus Crane
(c) Indian Elephant
(d) Indian Peafowl
CO2,L2
- Q(32) What was built in 1970 that led to a dispute in the Kaveri river region?
(a) Bhakra Dam
(b) Mettur Dam
(c) Tehri Dam
(d) Sardar Sarovar Dam
CO1,L2
- Q(33) DDT and Aluminium cans are examples of _____
(a) Primary Pollutants
(b) Secondary pollutants
(c) Biodegradable Pollutants
(d) Non-Biodegradable Pollutants
CO4,L4
- Q(34) Which government initiatives have contributed to India's rapid improvement in SDG scores?
(a) Pradhan Mantri Awas Yojana
(b) Swachh Bharat Mission
(c) Ayushman Bharat-PMJAY
(d) All of the above
CO2,L2
- Q(35) Describe ecological succession.
(a) A sudden change in the structure of an ecosystem
(b) A rapid increase in biodiversity
(c) The gradual process of change and replacement in an ecosystem
(d) A temporary disruption in an ecosystem
CO2,L2
- Q(36) What is the effect of land degradation on biodiversity?
(a) Increase in species diversity
(b) No effect on biodiversity
(c) Loss of habitat and species
(d) Creation of new ecosystems
CO2,L1
- Q(37) Which is the first state in India to make roof top Rain Water Harvesting Structure compulsory to all the across the state is
(a) Tamil Nadu (b) Karnataka (c) Kerala (d) None of these
CO1,L1
- Q(38) In an aquatic ecosystem, organisms appear in the food chain in the sequence of
(a) Zooplankton, Phytoplankton, Small fish, Large fish
(b) Phytoplankton, Zooplankton, Small fish, Large fish
(c) Small fish, Phytoplankton, Zooplankton, Large fish
(d) Large fish, Small fish, Phytoplankton, Zooplankton
CO2,L2
- Q(39) The most effective way to reduce GHG emissions is to increase
(a) Production of electric cars
(b) Energy efficiency and use of renewable energy
(c) Increasing reliance on widely available natural gas
(d) Use of coal gasification plants and scrubber technologies to reduce sulfur emissions
CO4,L4
- Q(40) Which agency is responsible for implementing the Air Act at the national level?
(a) National Green Tribunal (NGT)
(b) Central Pollution Control Board (CPCB)
(c) Ministry of Environment, Forests and Climate Change (MoEFCC)
(d) State Pollution Control Boards (SPCBs)
CO3,L4
- Q(41) What does the term "water footprint" refer to?
(a) Water stress index of a place
(b) The amount of water used for industrial purposes only
(c) The total volume of freshwater used by an individual, community, or country
(d) Water used for irrigation only
CO2,L1

Registration No.: _____

- Q(42) Sudesha Devi is associated with
(a) Bishnoi movement
(b) Narmada Bachao Andolan
(c) Appiko Movement
(d) Chipko Movement
CO1,L3
- Q(43) Which of the following is associated with Bishnoi movement?
(a) Gaura Devi
(b) Amrita Devi
(c) Govind Singh Rawat
(d) None of the above
CO4,L4
- Q(44) Deforestation cause threat to biodiversity in terms of
(a) Poaching
(b) Killing
(c) Habitat loss
(d) Botanical garden
CO1,L2
- Q(45) The environment Protection act of 1986 in india was enacted primarily in response to which environmental disaster?
(a) Bhopal gas tragedy
(b) Tsunami
(c) Chernobyl nuclear accident
(d) Uttarakhand floods
- Q(46) WWF stands for
(a) Web World Federation
(b) World Wildlife Federation
(c) World Wildlife Fund
(d) World Web Federation
,L4
- Q(47) Dodo is
(a) extinct
(b) endangered
(c) critically endangered
(d) rare
CO2,L2
- Q(48) Which organisation established 17 Sustainable Development Goals (SDGs) in 2015?
(a) United nations Environmental Protection Agency
(b) United Nation General Assembly
(c) United Nations Sustainable Development Organisation
(d) Unified Nation Generic Assembly
CO2,L1
- Q(49) Chipko Andolan is inspired by
(a) Narmada Bachao Movement
(b) Bishnoi movement
(c) Silent Valley Movement
(d) All of the above
CO1,L2
- Q(50) What is the primary objective of sustainable forest management?
(a) Maximizing timber production
(b) Reducing carbon emissions
(c) Ensuring that forest resources meet present needs without compromising future generations
(d) Preserving wildlife habitats
CO2,L1
- Q(51) Which Indian state hosts the largest number of national parks and wildlife sanctuaries?
(a) Kerala (b) Rajasthan (c) Madhya Pradesh (d) Karnataka
CO1,L2
- Q(52) Which two forms of alcohol do we include in biofuels?
(a) Methanol and Ethanol
(b) Propanol and Ethanol
(c) Propanol and Methanol
(d) None of the above
CO1,L1

Registration No.: _____

Q(53) Which of the following is not a direct effect of thermal pollution?

- (a) Algal blooms
- (b) Migration of aquatic species
- (c) Loss of biodiversity
- (d) Increased turbidity

CO1,L3

Q(54) Assertion (A): A food chain usually begins with a herbivore.

Reason (R): Herbivores feed directly on producers like plants.

- (a) Both A and R are true, and R is the correct explanation of A.
- (b) Both A and R are true, but R is not the correct explanation of A.
- (c) A is true, but R is false.
- (d) A is false, but R is true.

CO2,L1

Q(55) Which of the following is an example of genetic diversity?

- (a) Different species of birds in a rainforest
- (b) Different types of ecosystems in a country
- (c) Different breeds of dogs
- (d) Different biomes in a continent

CO2,L2

Q(56) What is the main objective of an environmental policy?

- (a) To increase industrial growth
- (b) To minimize environmental impact and promote sustainability
- (c) To encourage deforestation
- (d) To reduce government regulations

CO3,L3

Q(57) The environmental planning is:

- (a) The analysis of how we can increase deforestation
- (b) The analysis of how people impact natural resources
- (c) The supply of management tool to destroy our environment
- (d) The analysis of how we can increase poaching of environment

CO3,L2

Q(58) Different breeds of dogs represent

- (a) Ecosystem Diversity
- (b) Species Diversity
- (c) Genetic diversity
- (d) None of above

CO1,L2

Q(59) Which of the following statements is true about smog?

- (a) Smog is derived from the fog
- (b) Smog is derived from smoke
- (c) Smog is derived from water vapor
- (d) Smog is derived from both fog and smoke

CO1,L4

Q(60) _____ is the hotspot of Biodiversity in India.

- (a) Gangetic plain
- (b) Western ghats
- (c) Eastern ghats
- (d) Sunderbans

CO2,L2
